Listing of the Claims

This listing of Claims will replace all prior versions and listings of claims in the

application:

1. (Previously presented) Interactive television process applicable to a system

where at least one transmitting station transmits programmes to receivers, the

process comprising:

a) reception in one of said receivers, of a startup application and of a first

application and triggering of said startup application causing execution of steps

b) to d);

b) testing for a presence in a memory of said receiver of at least one file of

additional data:

c) in the absence of said file of additional data in said memory, starting up of

the first application;

d) if said file of additional data is present in said memory, starting up of a

second application using said file of additional data.

2. (Previously presented) Interactive television process according to Claim 1, wherein, with said transmitting station comprises at least one link for bilateral

communication with said receivers, said process comprises the following prior

steps:

e) reception of a message proposing loading of said file of additional data

into said receiver;

f) acceptance or refusal by a user of said receiver, of the proposed loading;

g) in case of refusal, exiting from the present process;

h) in case of acceptance, automatic downloading of said file of additional data

which is usable subsequently by said startup application into said receiver, via

said bilateral communication link:

i) recording in said memory of said receiver, of said file of additional data.

(Previously presented) Interactive television process according to Claim 2, comprising, before step f), the reception, by said receiver, of at least one cue

regarding the contents of said file of additional data, said que preferably being

chosen from among a size, a subsequent date of use, a date of expiry or of

onoscit from among a size, a subsequent date of use, a date of expiry of o

validity of the additional data, a date on which the additional data will be used, a

broadcasting channel which will use the additional data, and a downloading

address.

4. (Previously presented) Interactive television process according to claim 2,

comprising, before step h), a step in the course of which the user indicates a

choice of immediate downloading or of deferred downloading of said file of

additional data.

5. (Previously presented) Interactive television process according to claim 2,

wherein during step e), the reception of the proposal message is effected upon

the reception of an application of the same type as the second application.

6. (Previously presented) Interactive television process according to claim 1,

wherein said file of additional data contains an additional application.

7. (Previously presented) Interactive television process according to claim 1,

wherein during step a), said receiver also receives said second application.

8. (Previously presented) Interactive television process according to claim 1.

comprising a step of automatic erasing of the contents of said memory.

9. (Previously presented) Interactive television process according to claim 8,

wherein a date of erasure is associated with said file of additional data and in that
